

QUICK SPIKES-SPIDER INFORMATION SO YOU CAN DETERMINE THE SIZE YOU HAVE AND TIRE SIZE LISTING FOR QUICK STYLE

The Quick style of Spikes-Spiders are no longer manufactured, but many people have them and would like to determine the size they have. The Quick style traction elements are composed of black arms bolted onto a light grey plastic center. A particular traction element size is determined by the size (length) of black arms bolted onto a particular size of light grey plastic center. There are Spikes-Spider elements sizes from Size 0 to Size 4. The following is a table you can use to determine which size of Spikes-Spider traction elements you have. If you need parts for your Quick style, many of the parts are available on our Parts page on this web site up under "ORDER NOW".

A **Size 0**, consists of black arms with the Article Number **92.041** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.000** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

A **Size 1**, consists of black arms with the Article Number **92.041** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.001** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

A **Size 1.5**, consists of black arms with the Article Number **92.081** or **92.082** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.000** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

A **Size 2**, consists of black arms with the Article Number **92.061** or **92.062** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.001** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

A **Size 2.5**, consists of black arms with the Article Number **92.081** or **92.082** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.001** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

A **Size 3**, consists of black arms with the Article Number **92.061** or **92.062** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.021** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

A **Size 3.5**, consists of black arms with the Article Number **92.081** or **92.082** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.021** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

A **Size 4**, consists of black arms with the Article Number **92.102** pressed into the material on the inside of each arm near the bolt and the light grey plastic center the arms are bolted onto has the Article Number **92.021** that can be found on the front of the light grey plastic center pressed into the material in a little recessed area.

**THE FOLLOWING IS A LISTING OF TIRE SIZES
THE VARIOUS SIZES OF SPIKES-SPIDERS FIT**

If there is a blank next to the tire size, only the Compact, Sport or Alpine Pro will fit that tire-no Quick style will fit.
